QUALITY TOUCH!

- **LOW ACTUATOR PROFILE**
 The external actuator bezel has a low profile and reduced front thickness.

- **CUSTOMISING CAPABILITY**
 To simplify stock management, the series includes actuators without cap or lens and separate caps and lenses for quick installation or replacement on spring return and push-push types; all these are sold as accessories.

- **HIGH DEGREE OF PROTECTION**
 The actuators have been tested to guarantee a degree of protection per IEC/EN IP66, IP67, IP69K and UL Type 4X, appropriate for use even in extreme ambient conditions.

7

● QUICK AND EASY ACTUATOR INSTALLATION

- Actuator fixing on the mounting surface, through a Ø22mm/Ø0.87" drilled hole, is obtained using its **threaded ring**, easily rotated by hand or by socket spanner/wrench.

- There is an **anti-rotation fastener**, duly sized to avoid actuator rotation on the mounting surface and to give an orientation reference point for users during panel installation and during contact fitting on the actuator.
- This anti-rotation fastener collapses inside the gasket to allow fitting also when drilled holes are round without reference index.
- The sealing gasket for the actuator mounting surface has a gripping action (suction effect) offering additional adhesion properties.

- The mounting adapter and the actuators each have **clearly visible reference** indications making the snap-on fitting between the two easy and intuitive.

- Electrical contacts and LED elements are **snapped onto** the mounting adapter.
- The activation of the middle contacts is standard supplied on all non-illuminated spring return and push-push button or selector switch actuators.

● REDUCED DIMENSIONS AND INTERAXIS

- Minimum pitch:
- 30x40mm (1.18x1.57") between drillings for two actuators on a mounting surface
 - 30x55mm (1.18x1.97") between drillings for two double and triple-touch actuators or when spring clamp contacts are used.

- Total depth, from the external mounting surface to the end of the first contact element is just 43mm (1.69").

● CONTACT ELEMENTS

- Miniaturised size
- High electric conductivity - 5V 1mA
- Up to 9 contact elements can be installed, 3 rows of 3 elements
- Available versions: Front and base mount with screw terminals while front-mount only with faston and spring-clamp terminals
- Contact operation: double breaking action, direct (positive) action operation and wiping effect.

● HIGH-LUMINOSITY LED ELEMENTS

- Miniaturised size
- Long electrical life: 100,000h
- Versions for base mounting and with screw or spring-clamp terminals
- Overvoltage protection
- Withstand vibrations
- Protection against stray currents in wiring
- Flickering phenomenon reduction
- Steady and flashing light versions
- Supply voltages:
 - 12-30VAC/DC
 - 85-140VAC
 - 185-265VAC
- Test elements installed beside and connected with the relative LED element allow checking if all LED elements of the installation are working properly.

- ELEGANT STYLE AND ERGONOMIC DESIGN**
 All the series elements have an ergonomic design and, at the same time, particular care has been given to minimum detail aesthetics.
- LONG ACTUATOR MECHANICAL LIFE**
 High performance characteristics assure 5,000,000 cycle mechanical life for spring-return actuators, 1,000,000 for double and triple touch units and 300,000 for emergency-stop types.
- MATERIALS RESISTANT TO OILS, SOLVENTS AND HYDROCARBONS**
- USAGE AT EXTREME TEMPERATURE CONDITIONS**
 Operation temperature range between -25° and +70°C.
- UL LISTING FOR USA AND CANADA ALONG WITH EAC AND CCC CERTIFICATIONS.**

DOUBLE AND TRIPLE TOUCH ACTUATORS

- IEC IP66, IP67, IP69K and UL Type 4X degree of protection
- Double touch button actuators, with 2 flush or 1 flush and 1 extended buttons
- Triple touch button actuators with 2 flush and middle extended buttons
- Versions with or without indicator.

MECHANICAL RESET BUTTONS

- Rod adjustment directly on actuator front (1...4mm / 0.04...0.16")

- Up to 6 contact elements can be mounted.

EMERGENCY STOP ACTUATORS

- Actuator structure suitable to warrant direct opening operation with mechanical latching for emergency stopping per ISO 13850 and IEC/EN 60947-5-5.
- Auto-monitor contact elements are available with functions to:
 - Constantly control the correct installation (mounting adapter and NC contact with the actuator) and proper operation of the NC contact
 - Open the circuit in the case of malfunctions (e.g. the contact detaches from the mounting adapter due to strong vibrations or shock).

- There is a green line around the actuator body to spot when the emergency stop is at rest or activated.
- Use of **Ronis keys**
- Various accessories available (e.g. yellow E-stop disks, padlockable protection and rubber actuator boots).

SELECTOR SWITCH ACTUATORS

- Knob design assures excellent grip

- **High visibility** on front or side and actuator inscription shows exact switch position

- Use of **Ronis keys**

- **Activation of the middle contacts is standard supplied** on 2 and 3 position selector switches.

EXTENSIVE CHOICE OF ACCESSORIES

- Pilot light heads and monoblock LED-integrated pilot lights (IP65).

- Monoblock buzzers (IP40).

- Communication interfaces (IP65) USB and RJ45 types for Ethernet and data transmission in both directions with equipment.

CONTROL STATIONS

- IEC/EN IP66, IP67 and IP69K and UL Type 1, 2, 3R, 4, 4X and 12K protection degrees
- Empty pushbutton stations with 1 to 6 way option and complete control stations with various mushroom-head stop buttons
- Quick installation and wiring ease with the relative base-mount contact and LED elements, snap in place on the base
- Installation of screw and spring-clamp terminal contact and LED elements also on the internal cover surface.

Normal operation of auto-monitor contact mounted on surface or on cover of control stations

With contact type LPX C01SM

If the contact LPX C01SM detaches from the actuator due to **strong vibrations or shock**, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in **contact .3-.4 closing**.

With contact type LPX C02SM

If the contact LPX C02SM detaches from the actuator due to **strong vibrations or shock**, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in **contact .3-.4 closing**.

- Filament bulb, BA9s U_s≤130VAC/DC max 2.6W (not supplied); maximum dimensions 11x28 mm (0.4x1.1"). For higher voltages, use neon bulbs.
- Not suitable for 3-position selectors.
- Filament bulb, BA9s (not supplied); maximum dimensions 11x28mm (0.4x1.1"). Suitable for AC duty only.
Use bulbs with rated voltage equal to that of the power supply.
E.g.: With LM2T FL230, use 110VAC bulbs if power supply is 110VAC and 230VAC bulbs if power supply 230VAC. 2.6W max bulb rating.
- MultileD bulbs must not be fitted.
- In case of test circuits for lamp-holders having load in parallel, two LM2T T100 elements are required for each bulb.
Refer to the wiring diagram attached to the product or consult Customer Service; see contact details on inside front cover.
- In case of neon bulbs, consult Customer Service; see contact details on inside front cover.
- Only use with lamp-holder elements:
 - With direct supply
 - With resistor and diode
 - LED LM2T LB... and LM2T MB... types.
- Not suitable for use with test element.
