

Think Automation and beyond...

IDEC SE4D Safety Light Curtains

Safety - when & where you need it most

SE4D Safety Light Curtains

Light curtains are used to keep production environments safe for both operators and maintenance workers by stopping machines when unsafe or dangerous areas have been accessed.

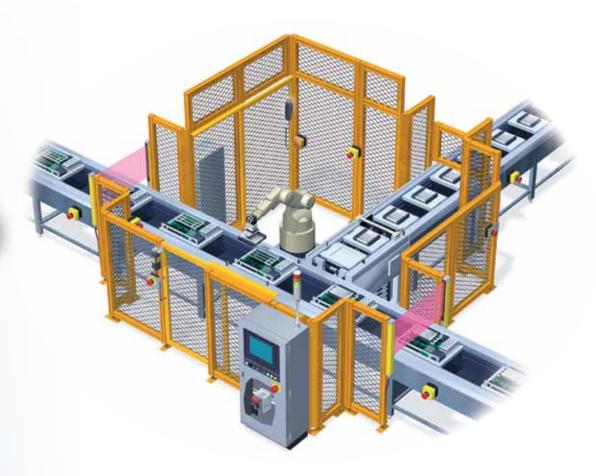

Typical Applications:

- Automated manufacturing
- Packaging, material handling & storage machines
- Textile, woodworking and ceramic
- Automatic and semi-automatic assembling lines
- Automatic warehouse & inventory systems

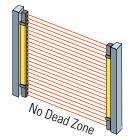

No Dead Zones for easy installation

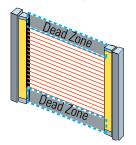

No Dead Zone

Conventional light curtains have a dead zone where there isn't any beam axis at the end of the units. With SE4D light curtains, the first beam axis is placed right along the edge, so detection can be performed along the entire length. Since it is not necessary to install it outside of the detection area in order to cover the dead zone, the SE4D light curtain can easily fit in any space.

SE4D Light Curtains

Conventional Light Curtains

Conventional Light Curtains

Outside Mounting

Externally mounted light curtains can restrict access to equipment and machinery.

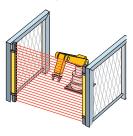

Inside Mounting

A customized barrier must be installed, at the bottom of the light curtain, to protect the dead zone.

SE4D Light Curtains

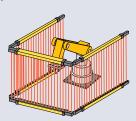

Because there are no dead zones with the SE4D Light Curtains, they fit easily into any application making them a safe and more flexible solution.

Easy to cascade & mute

■ Cascading with No Dead Zone

Series Connection

Up to 3 units - 192 beams

To cover "L" or "U" shaped configurations or to guard both the front and back of a machine, up to 3 light curtain sets (emitter and receiver) can be connected together in a series without any dead zones.

Conventional Method

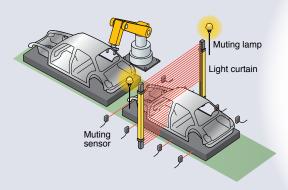

Units must overlap and can cause additional obstructions or unsafe areas.

SE4D Light Curtains

No dead zones!

Muting without Dedicated Controller

The SE4D light curtain is equipped with a muting function that causes production to stop when a person passes through the light curtain, but does not stop when an object passes through.

The advantage of the SE4D is that a muting sensor and muting lamp can be directly connected to the light curtain. A special controller for muting is not required.

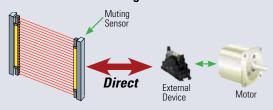

Conventional Method

Switches Unlimited, Technical Dept. tech@switchesunlimited.com Phone: 800-221-0487 * Fax: 718-672-6370 www.switchesunlimited.com

SE4D Light Curtains

Because a special controller is not needed with the SE4D Light Curtains, a muting senor and lamp can be directly connected reducing costs and saving installation time.

Smart safety

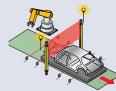

Override

When a light curtain is interrupted by an object or when operations stop before muting conditions are established (when only one muting sensor is interrupted), the object interrupting the light does not have to be removed. Therefore, operations can easily and safely resume.

Override Function

No Override Function

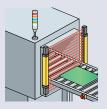

No need to remove object for restart.

Object must be removed for restart.

■ Fixed and Floating Blanking*

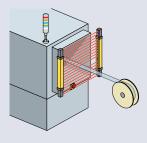

Fixed Blanking

Fixed blanking prevents the control output (OSSD1/2) from turning off when a specific beam is interrupted.

This is used in applications where a specific beam is always interrupted. When the object is moved outside of the sensing area, the control output (OSSD1/2) turns off.

Floating Blanking

Floating blanking function prevents the control output (OSSD1/2) from turning off when the number of beams interrupted is less than a preset number. The number that can be set is from 1 to 3 beams. This function enables sensing even when the position of the obstacles changes in the sensing area.

Note: The size of the minimum sensing object can change when the floating blanking function is used.

Switches Unlimited, Technical Dept. tech@switchesunlimited.com

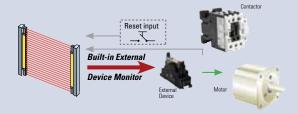

Phone: 800-221-0487 * Fax: 718-672-6370

www.switchesunlimited.com

^{*}A controller (SE9Z-HC) is required for setting blanking functions.

Fast operation & simple setup

Built-in EDM (External Device Monitoring)

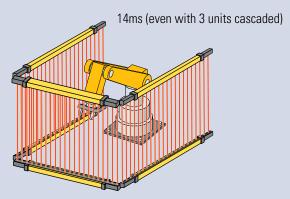

Since the SE4D light curtains have built-in EDM (external device monitoring), a safety circuit can easily be constructed without a safety relay module. As a result, the control panel can be downsized and costs reduced.

Switches Unlimited, Technical Dept. tech@switchesunlimited.com Phone: 800-221-0487 * Fax: 718-672-6370 www.switchesunlimited.com

■ Fast Unified Response Time of 14ms

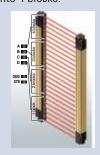

Series Connection - up to 3 units or 192 beams

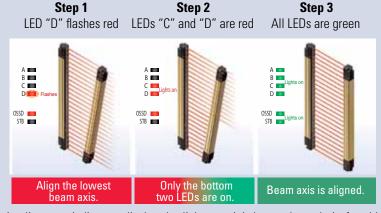

Regardless of the number of beams or the number of light curtains connected in a series, the maximum response time is 14ms! This reduces the time needed to calculate safety distances.

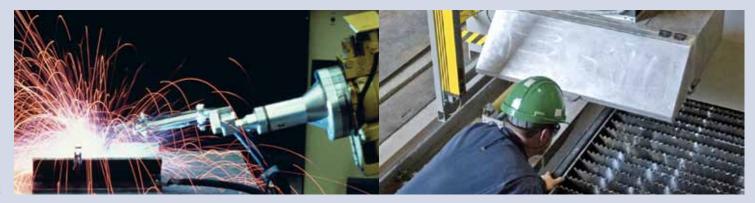

■ Beam Axis Adjustment

Light beams are divided into 4 blocks

Beam-axis alignment indicators display the light curtain's beam channels in four blocks. When the beam channel at the bottom channel (or top channel) is correctly aligned, the LED will blink red. Each block then lights red as the beam axes become aligned. When all channel beam axes are aligned, all LEDs will be green. The display also has a stability indicator (STB) to assist with setup.

■ Both PNP & NPN Supported in One Model

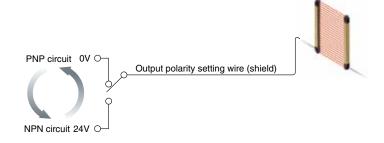

Both PNP and NPN transistor outputs are available in one light curtain.

Switches Unlimited, Technical Dept. tech@switchesunlimited.com Phone: 800-221-0487 * Fax: 718-672-6370 www.switchesunlimited.com

Switch Between PNP/NPN by Changing Wiring

When the output polarity setting wire (shield) is connected to OV the output is PNP. It becomes NPN when connected to 24V.

Output Polarity Setting Wire (shield)	Control Output (OSSD)
Connect to 0V	PNP output
Connect to 24V	NPN output
Not connected/open	Error

Part Numbers

SE4D Light Curtains

Shape	Minimum Sensing Object	Sensing Distance (Note 2) (Effective Distance)	No. of Beams	Sensing Length (mm)	Part Number (Note 3)
			12	230	SE4D-H12
, V			16	310	SE4D-H16
			20	390	SE4D-H20
∬Beam No. 5mm			24	470	SE4D-H24
Sensing Length Sensing Length Beam pitch Smm			28	550	SE4D-H28
	ø25mm		32	630	SE4D-H32
		0.3 to 9m	36	710	SE4D-H36
			40	790	SE4D-H40
			48	950	SE4D-H48
			56	1,110	SE4D-H56
		64	1,270	SE4D-H64	
			72	1,430	SE4D-H72
			80	1,590	SE4D-H80
		0.3 to 7m	88	1,750	SE4D-H88
20mm		0.0 10 7.11	96	1,910	SE4D-H96

- 1. Package quantity is 1 set (emitter/received). Mounting brackets and bottom cap cables are not included with the light curtain. Purchase a mounting bracket and bottom cap cable separately.
- 2. The sensing distance is the possible setting distance between the emitter and the receiver.
- 3. The light curtain with "E" in the part number (indicated on the nameplate) is the emitter. The light curtain with "D" in the part number (indicated on the nameplate) is the receiver. Example for SE4D-H12: Emitter = SE4D-H12E, Receiver = SE4D-H12D

Accessories

Item	Description	Cable Length	Weight	Part Number	Remarks	
	8-pin Bottom Cap Cable	3m	370g approx.	SE9Z-CCB3		
		7m	820g approx.	SE9Z-CCB7	Standard cable Cable diameter: ø6mm	
		10m	1,160g approx.	SE9Z-CCB10	Cable color: Emitter - Gray, Receiver - Gray with black line Minimum bending diameter: R6 mm	
		15m	1,710g approx.	SE9Z-CCB15	•	
	12-pin Bottom Cap	3m	420g approx.	SE9Z-CCB3-MU	Used for muting function Cable diameter: ø6mm	
Cable		7m	930g approx.	SE9Z-CCB7-MU	Cable color: Emitter - Gray, Receiver - Gray with black line Minimum bending diameter: R6 mm	
	Cable for Series Connection	0.5m	95g approx.	SE9Z-CSL05	Used for connecting the light curtains in series. Cable color: Gray (for emitter and receiver) Minimum bending diameter: R6 mm	

Each pkg contains 2 cables.

Controller

Name and Shape	Part Number			
Controller (adapter cable, 2 pcs, included)	SE9Z-HC			
Cable for Connecting Controller	SE9Z-WNC1			

The controller is used for setting optional functions. The cable is used for connecting the controller and the light curtain. Order the cable when purchasing the controller.

Mounting Brackets

Item	Part Number	Remarks
Standard Mounting Bracket	SE9Z-SED-1	Mounting bracket for easy adjustment of the beam axis. Includes 2 hexagon socket head screws (M5) or 1 hexagon socket head screw (M8). The light curtain can be rotated 360 degrees. Material: Zinc diecast
M8 Mounting Bracket	SE9Z-SED-1-T	Mounting bracket for easy adjustment of the beam axis. The light curtain can be rotated 360 degrees. Material: Zinc diecast
Dead Space Mounting Bracket	SE9Z-SED-3	Mounting bracket that eliminates dead space. Material: Zinc diecast

Package Qty: 4

Specifications

General Specifications

Applicable standards	IEC/EN 61496-1 (TÜV), IEC 61496-2 (TÜV), IEC 61508-1 to 4 (TÜV), ISO 13849-1 EN ISO 13849-1 (TÜV), EN 50178 (TÜV), EN 55011 (TÜV), EN 61000-6-2 (TÜV), UL 61496-1/2 (UL), UL 1998 (UL), CSA C22.2 No.14 (c-UL), CSA C22.2 No.0.8 (c-	UL 508 (UL),			
Minimum Sensing Object	ø25mm (opaque)				
Effective Aperture Angle	When detection distance is more than 3m: within ±2.5° maximum (IEC 61496-2, UL 61496-2)				
Rated Voltage	24V DC ±20% Ripple P-P10% maximum				
	PNP open-collector transistor / NPN open-collector transistor (switching type)				
Control output (OSSD1/2)	PNP Output Maximum source current: 200mA Applied voltage: Same as supply voltage (between control output and +V) Residual voltage: 2.5V max. (source current 200mA, using 15m length cable) Leakage current: 0.1mA max. (includes power off state) Maximum load capacity: 0.22µF (no load to max. output current) Load wiring resistance: 3W max.	NPN Output Maximum sink current: 200mA Applied voltage: Same as supply voltage (between control output and 0V) Residual voltage: 2.5V max. (sink current 200 mA, using 15m length cable) Leakage current: 0.1mA max. (includes power off state) Maximum load capacity: 0.22µF (no load to max. output current) Load wiring resistance: 3W max.			
Operation mode (Output operation)	ON when all beams are received, OFF when one or more beams are interrupted (Also turns OFF at sensor or synchronization error)	d (Note 1, 2)			
Protection circuit (Short-circuit)	Built-in				
Response Time	OFF response: 14ms max., ON response: 80 to 90ms				
	PNP open-collector transistor / NPN open-collector transistor (switching type)				
Auxiliary output (Non-safety output)	PNP Output Maximum source current: 60mA Applied voltage: Same as supply voltage (between auxiliary output and +V) Residual voltage: 2.5V min. (source current 60mA, using 15m length cable)	NPN Output Maximum sink current: 60mA Applied voltage: Same as supply voltage (between auxiliary output and 0V) Residual voltage: 2.5V min. (sink current 60mA, using 15m length cable)			
Operation mode (Output operation)	When OSSDs are ON: OFF, when OSSDs are OFF: ON (factory set) [Operation modes can be changed by using the SE9Z-HC controller (optional).]				
Protection circuit (Short-circuit)	Built-in				
Response Time	OFF response: 34ms max., ON response: 110ms max.				
Interference Prevention Function					
Emission Halt Function					
Interlock Function	Duille in				
External Device Monitoring Function	- Built-in				
Override Function					
Muting Function					
Optional Functions (Note 4)	Fixed blanking function, Floating blanking function, Auxiliary output switching adjust function, Muting setting adjust function, Protect function, Emitted light				
Degree of Protection	IP65, IP67 (IEC 60529)				
Operating Conditions	Operating temperature: -10 to +55°C (no freezing) Relative humidity: 30 to 85%RH (no condensation) Storage temperature: -25 to +70°C (no freezing) Storage humidity: 30 to 95%RH (no condensation) Pollution Degree: 3				
Operating Illuminance	Incandescent lamp: 3,500 lux max. at light-receiving surface				
Dielectric Strength	1,000V AC, 1 minute between power terminals connected together and enclosure				
Insulation Resistance	20MW minimum (500V DC megger) between power terminals connected together and enclosure				
Vibration Resistance	Damage limits: 10 to 55Hz, amplitude: 0.75mm 2 hours each in 3 axes				
Shock Resistance	Damage limits: 300m/s² (30G approx.) 3 times each in 3 axes				
Light Source	Infrared LED (emission wavelength = 870nm)				
Connection	Connector				
Material	Enclosure: Aluminum Upper / lower case: Aluminum Sensing surface: PC / Polyester resin Cap: PBT				
Accessories	SE9Z-SED-2 (intermediate supporting bracket) (Note 3), SE9Z-TR25 (test rod): 1				

- Does not turn OFF during muting even when the light beam is interrupted.
 When the blanking function is enabled, the operation mode changes:

Floating Blanking Function (Min. Sensing Object)				
No potting	Setting			
No setting	1 beam	2 beam	3 beam	
ø25mm ø45mm ø65mm ø85mm				

Switches Unlimited, Technical Dept. tech@switchesunlimited.com Phone: 800-221-0487 * Fax: 718-672-6370 www.switchesunlimited.com

^{3.} The number of intermediate supporting brackets that is included differs with each model. SE4D-H40/H48/H56 = 1 set, SE4D-H64/H72/H80 = 2 sets, SE4D-H88/H96 = 3 sets 4. When using the optional functions, the controller is required.

Controller

Part Number	SE9Z-HC
Supply Voltage	24V DC ±10% Ripple P-P10 % or less (common to light curtain power supply)
Current Consumption	65mA max.
Communication Method	RS-485 two-way communications (exclusive procedure)
Digital LED	4-digit red LED display × 2 (selected beams and settings are displayed)
Functional LED	Green LED × 9 (lights on when set)
Functions	 Fixed blanking function (factory setting: disabled) Floating blanking function (factory setting: disabled) Auxiliary output switching function (factory setting: negative logic of OSSD) Emitted light intensity control function (factory setting: disabled) Muting setting adjust function (factory setting: enabled, 300ms) Override setting adjust function, Setting detail monitoring function Protect function (factory setting: disabled) (factory password setting: 0000) Initialization function Copy function
Operating Conditions	Operating Temperature: -10 to +55°C (no freezing) Operating Humidity: 30 to 85% RH (no condensation) Storage Temperature: -25 to +70°C (no freezing) Storage Humidity: 30 to 85% RH (no condensation)
Dielectric Strength	1,000V AC, 1 minute between power terminals connected together and enclosure
Insulation Resistance	$20M\Omega$ min. (500V DC megger) between power terminals connected together and enclosure
Cable	8-core shielded cable, 0.5m 1.640 ft long, with a connector at the end (2 cables)
Weight (approx.)	200g
Accessories	Adapter cable: 2

^{1.} The operating humidity is +20° for conditions that are not specified.
2. To enable the muting function, A or B input order can be specified. The muting function is enabled, at the factory, whether muting A or B is input first.

Light Curtains with Standard Mounting Bracket (SE9Z-SED-1) & Intermediate Supporting Bracket (Note 1)
